Lab - Create a Full-Featured Retail Agent

- Execute the tutorial at
  https://codelabs.developers.google.com/codelabs/dialogflow-cx-retail-agent

- Start at Step 3

- After entering a few of the intents and training phrases, instructor will provide a file that you can use to import and complete them

- If divided over two days, export the agent on day one and restore on day two to pick up where you left off

- After the attendees have been provided with enough time to explore the steps involved in executing the lab, the instructor will provide you with an export of the fully completed agent

- The instructor will also demonstrate the rich content capabilities as the sandboxes do not allow registration of an integration with DialogFlow Messenger
